

## ENVIRONMENTAL POLICY

As Erkurt Holding and Formfleks Branches, we are committed to protect our natural resources by improving the resources of our ever-shrinking world, to continuously improve our environmental management system, to protect the environment, to reduce our impact on the environment, to increase our environmental performance in our entire value chain in line with the principles of sustainable development and circular economy.

Based on this aim:

- We continuously review all our processes from the entry of raw materials to the shipment of our products, ISO 14001 standard, environmental legislation and main industry requirements at national and international level and we are committed to the fulfillment of legal obligations.
- We identify risks and opportunities in our business processes and strategies and take measures to minimize environmental risks. Considering the risks of the climate crisis, we carry out activities to reduce Greenhouse Gas emissions in the fight against the climate crisis.
- We evaluate the environmental impacts of our new investments and procurement activities, utilize new environmentally sensitive technologies and methods, and commit to protecting the environment and working safely.
- We focus on efficient use of resources for energy consumption, water consumption, resource consumption and chemical consumption using Clean (Sustainable) production technologies.
- We develop environmentally sensitive products, aim to control environmental impacts and work to reduce these impacts in all business activities and product life cycle stages.
- We minimize our impact on soil, water and air pollution by controlling our wastes at source and increasing their reuse and recovery.
- We work to keep air emissions under control to prevent air pollution. We carry out periodic checks and define measures to reduce noise emissions. We make improvements to prevent climate change and reduce greenhouse gas emissions.
- We focus on maintaining, continuously improving and enhancing the capacity of ecosystems, habitats and natural ecosystems and aim to sustainably manage impacts on biodiversity.
- We keep our environmental policy open to our employees, suppliers, customers and all related parties.
- We carry out activities to ensure that our employees, subsidiaries, suppliers, contractors, subcontractors, business partners, outsourcing partners and other operational stakeholders implement this Policy, and we provide training and support to our stakeholders to reduce their environmental impact, increase and improve their environmental performance.
